Purpose of Request, additional information:

Fauquier County Department of Environmental Services is requesting approval to expand the existing Fauquier County Morrisville Convenience Site by approximately 9,743 sq. ft'. The basis for the request is that the County has outgrown this Convenience site since its conception in 1979. This facility provides containers for recycling and the sanitary disposal of solid waste from Fauquier County residents.

- Refuse Collection and Recycling services are provided seven day per week and serve approximately 120,000 Fauquier County residents annually.

- Hours of operation are 7:00 am - 3:00 pm Mon, Tues, Thurs, Friday
10:00 am to 7:00 pm Wednesdays and 9:00 am to 5:00 pm on Saturdays & Sundays

- Holiday closings are: Memorial Day Fourth of July, Labor day, Thanksgiving, Christmas and New Years days.

- The facility provides trash collection and recycling services in two trash compactors, two open top thirty cubic yard containers for bulk waste and recycling containers for used oil, glass, cans, newspaper, cardboard, metal and plastic bottles.

The 1" to 20' Scale site plan illustrates the following:

- Site needs to expand by approximately 9,743 square feet , 28' to the northwest and 43' to the north northeast.

- The entrance and traffic access remain unchanged except for a new gate, signage, flowers & shrubbery

- Screening Fence will be provided along the Northwest boundary screening the France property.

The 1" to 20' Scale Aerial Photograph illustrates conditions that existed in 1998. It should be noted that site facilities and use boundaries have been pushed further and further back over time to accomodate growth. The site has been too small for years.

In summary this is a very minor project expansion but the expansion is critical to provide safe ingress egress for the public.
